

Tapered Roller Bearings

Tapered Roller Bearings | The Timken Company

Timken offers the most extensive line of **tapered roller bearings** available anywhere in the world.

Tapered roller bearings are uniquely designed to manage both thrust and radial loads on rotating shafts and in housings. We manufacture nearly 26,000 **tapered roller bearing** combinations – in single, double and four-row tapered roller bearing configurations. Customized geometries and engineered surfaces can be applied to these tapered roller bearings to further enhance performance in demanding applications.

Eg:

DESCRIPTION	BRAND	Unit Price(USD)	Dimension(m m)	weight /unit(kg)	QTY	Total Price	Country Manufacture
LM757049/LM757010	TIMKEN	600 \$	304.8*406.4*63.5	21.44	10	6000.00\$	AMERICA
